

The Visual Elements

The seven <u>Visual Elements</u> are the building blocks of visual art. Every piece of art you make will use some (or possibly even all) of these elements.

ELEMENT:	DESCRIPTION:	EXAMPLE:
LINE	A continuous mark . Line is used to describe the edges of objects, shapes and spaces and can be used to produce effects of tone , pattern and texture .	
SHAPE	When a line joins up with itself, a shape is formed. Shape describes the outline of an object and the space inside and outside of it. Positive space is inside the object, Negative space is outside.	
TONE	The lightness or darkness of an image or colour (sometimes called Value). It shows the shadows and highlights . Tone varies from white through greys to black and can be used to make a shape look three dimensional.	
COLOUR	Primary colours: red, blue and yellow. Secondary colours: green, orange and purple. Complimentary colours (pairs of colours opposite each other on the colour wheel): blue and orange; red and green; yellow and purple.	
FORM	The physical volume of a shape in a space . Usually 3D (like a sculpture), but can be the illusion of 3D (for example by using tone)	100
PATTERN	A regular arrangement or repetition of an element (line , shape , colour , etc) or motif.	★ ₩ ₩
TEXTURE	The feel of a surface or the illusion of how it appears it would feel. It might be smooth, rough, silky, furry, etc.	

Key Words

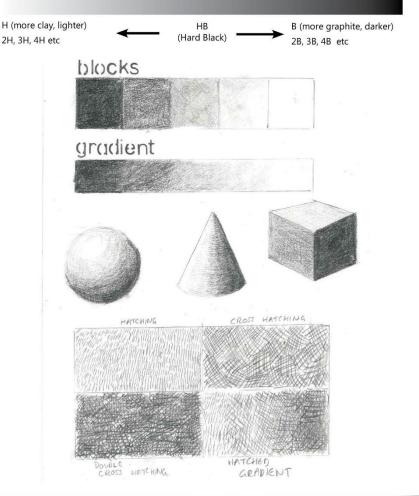

Primary ColourColours which can't be made by mixing other colours – Red, Yellow and BlueSecondary ColourColours made by mixing two primary colours – Green, Purple and OrangeComplimentary ColourColours which are opposite on the colour wheel – Red/Green, Blue/Orange, Yellow/PurpleHarmonious ColourColours that sit next to, or near each other on the colour wheel – e.g. Blue, Green, YellowGradientA gradual change in tone or colour, without stops betweenCompositionThe combination of parts (or elements) to form a whole. The structure of art, music or even writing.Medium/MediaThe materials a work of art is made from – e.g. pencil, paint, chalk, ink, photographyMixingWith paints, inks or other wet media, combining two or more colours to create a third.BlendingSimilar to mixing, but with dry media. The colours are combined on the paper or canvas.AbstractArt that does not attempt to represent reality – colours, tones, lines and shapes.FigurativeArt that does try to represent reality, showing figures or objects that exist in real life.

Tone

Tone describes the lightness and darkness of an image. When drawing with tone, you should aim for at least 5 different tonal values: White, Light Grey, Mid Grey, Dark Grey and Black.

Pencil Grades:

The different grades of pencil each have a different tonal value. Hard pencils (H) contain more clay, and are lighter. Black pencils (B) contain more graphite, and are darker. An HB (HARD/BLACK) pencil is in the middle of this range and will give you a mid grey (HB pencils are good for lightly sketching out your line work)

COLOUR

PRIMARY COLOURS

Red, Blue and **Yellow** are the three **Primary Colours**. They are called this because they <u>cannot be made by mixing other colours together</u>, but they combine to make other colours.

SECONDARY COLOURS

Green, **Purple** and **Orange** are **Secondary Colours**. These are made by <u>mixing together two Primary Colours</u>. You can see on the colour wheel below that each secondary colour sits in between the two primary coulours that make it:

Red + Blue = Purple,

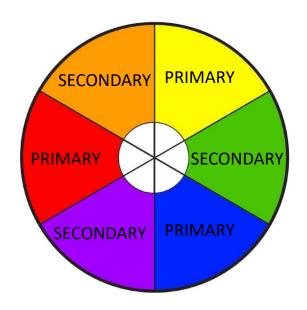

Red + Yellow = Orange,

Blue + Yellow = Green.

COMPLEMENTARY COLOURS

Colours that are **opposite** each other on the colour wheel are called **Complementary Colours**. Each secondary colour is directly opposite the primary colour that <u>doesn't</u> go into making it. So red is opposite green because red is the only primary colour that doesn't go into green - blue and yellow do.

The Colour Wheel

Abstract Artists

Wassily Kandinsky (1866-1944)

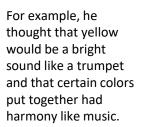

Wassily Kandinsky was a Russian painter who is considered to be one of the founders of Abstract art. Although he started painting scenes and objects from real life, he began to believe that paintings did not need to represent a subject, but could be represented by colours and shapes alone.

Kandinsky was very keen on music, and thought that art should be no different – his paintings are an attempt to show feelings and music through colors and shapes in his paintings.

Yellow, Red, Blue (1925)

Swinging (1925)

Ladders Cross the Blue Sky in a Wheel of Fire (1953)

The Smile of the Flamboyant Wings (1953)

The Singing Fish (1972)

Joan Miró (1893 – 1983)

Joan Miró was a Spanish painter, sculptor and ceramicist. He started painting at a young age and quickly developed a unique style although not a purely abstract one. In his paintings can be seen figures, creatures, symbols, stars, planets and all sorts of other objects, all painted in a simplistic, almost child-like style.

Miro was very influenced by early cave paintings discovered in his native Spain, and some of the figures in his paintings resemble these prehistoric drawings.

Abstract Artists

Patrick Heron (1920-1999)~

Patrick Heron was a British artist who spent most of his life living in Cornwall, which influenced a lot of his paintings – much of what he painted was inspired by the scenery and light of the place. Heron believed that every bit of the painting was equally important and should get the same amount of attention. He was very concerned with the use of colour in his work, and his paintings are recognisable for their use of very vibrant colour.

Three Reds in Green and Magenta in Blue (1970)

Yellow Painting (1958)

Azalea Garden (1953)

Prismes Electrique (1914)

Simultaneous Contrasts (1913)

Rhythm Colouer (1939)

Sonia Delaunay (1885-1979)

Sonia Delaunay was a Russian painter, illustrator and textile designer who was one of the early pioneers of abstract painting.

Delaunay, along with her husband Robert, founded the art movement known as Orphism, which was also known as Simultaneism.

Orphism was concerned with the interaction of colours when placed alongside each other – how one colour or shade can appear differently depending on the colour it is placed next to.

Although the paintings look purely abstract, it is possible to see real life objects in many of them, such as buildings, or propellers of aeroplanes.
